-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 6-8 rejected under 35 U.S.C. 102(e) as being anticipated by Yamazaki (Patent Application Publication US 2003/0081137 A1).

Yamazaki discloses a contrast focus detector as elements 34-40 performing the step S128 in Fig. 4; a phase-difference focus detector as elements 14 and 40 performing the step S112 in Fig. 4; a controller for moving the focusing lens group 32 as elements 40 and 46; and a moving range for detecting contrast varied in accordance with a degree of reliability of the phase-difference in-focus position is shown in step S122 of Fig. 4. Applicant's attention is directed to numbered paragraphs 0055-0057, 0062, 0063, and 0070 in particular describing the specific nature of the degree of reliability of the phase-difference in-focus signal.

Allowable Subject Matter

3. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2851

Reasons for Patentability

4. The primary reasons for patentability of claims 2-5 are the specific natures of the reliability set forth in claims 2 and 3.
